

# SRH MARINE SAIT

# DELTA FLEET

## Delta Fleet

### Automated ENC's, Publications & Updates

A seamless solution that combines connectivity and charts plotting. Provides the means for the most cost-efficient paperless Navigation by distributing automatically all ENC related Digital Services.

### Key Benefits

- Advanced e-Navigation tool
- Dedicated Connectivity including Airtime
- Reduced planning time
- Flat Fee or Spot subscriptions for AVCS, ADPs, AEN, tM, Witherby, T&Ps, eNTM, IMO publications
- Auto approved orders or Semipredefined

The system is consisted of SRH Charts distribution platforms & SRH Plug, compatible with all ECDIS manufacturers, that facilitates the transmission of data, through high speed connectivity, provided by Inmarsat.

SRH Delta can host add-on services and applications for route optimization at any time at flexible invoicing schemes.

SRH Delta provides mariners with tools and data necessary for a safe route planning without the hassle of corrections and updates. Manages Charts collections and charts information overlays even corrections for paper charts.

Back of Bridge is synchronizing with SRH's ENC server, manages orders for data, make the requests available to vessel's operator and eventually feeds ECDIS directly.

## Advantages

- The Solution is compatible with any existing ECDIS
- Accessible to Mariner and shore personnel at anytime
- Airtime traffic is included with Delta Fleet subscription
- Planning tool for budget owners ashore
- Integration capabilities with Supply Chain and ERP platforms

## Usage scenarios

- Back of Bridge software on any computer onboard or ashore
- Ship's Operator portal to bridge e-navigation data and collections
- Navigation officer's primary aid to his duties
- Logistics optimization offshore – ashore
- Reports generation for Vetting Inspectors and Port Authorities
